

Experienced Project Manager For a thriving audio amplifier company

Are you tired of long, never ending projects and can you steer projects safely from beginning to end? Then we need you to support the growth of ICEpower, as part of our winning culture, where teamwork and great sound is in the main seat.

In ICEpower we pride ourselves to deliver the highest of quality and performance at a cost competitive prize, done with engineering excellence and close partnering. Typically, the projects are made for a specific customer where you as the project manager will have the primary contact. All this is being possibly by having one of the world's largest power houses of audio amplification and power supplies including the best engineers within the fields of Analogue hardware, Digital hardware, Embedded software, and Mechanics.

Your daily base will be here in Søborg, where the products themselves are developed by our R&D department. They are then manufactured at EMS partners in Thailand. Travelling are expected, mainly to our EMS partners and the specific costumers. In your day-to-day work, you will take responsibility of the project management of 1-2 projects depending on the size and manage the project team and stakeholders.

Together with a handful of other project managers and around 70 other employees you will be apart of a winning culture with highly skilled people.

The Role

- Responsible for project management of 1-2 projects
- Responsible for Unit cost, Time schedule, Development cost
- Daily management of project team of Analogue hardware, Digital hardware, Embedded software, and Mechanics engineers
- Manage Customer relations for the projects
- Report to ICEpower Management on 6-8 weekly basis
- Stakeholder management of Customers, Internal stakeholders, and Asian manufacturing partners.
- Close collaboration with R&D, Operations, Marketing and Finance
- Participate in creating project management processes (PMO work)
- Hands on work

The Qualifications

- 5-xx years of relevant Project manager experience
- Preferably an engineering degree or similar, to understand the products and engineering ways of thinking.
- Preferably experience with project management from other high-tech companies
- Experience with product development of products including software and hardware.
- Proven track record of managing projects and meeting KPIs
- Experience in general facilitation e.g. project planning, workshops, etc.
- Experience with customer relations
- Having a project manager toolbox with a variety of project management methodologies and tools.
- Experience with stage/gate and agile processes
- Preferably proficient with commonly accepted project management frameworks
- Preferably experience with PLM/PDM systems – we use Arena
- Experienced in oral, written, and visual communication to senior management and other stakeholders.
- Fluency in the English language is required.

The Individual:

- Being a project manager by heart
- Well-developed analytical abilities and a structured approach.
- Business understanding and financial insight.
- A good communicator
- Ability to translate complex things into easy-to-understand presentations.
- The mindset of achieving goals
- Thrive in a dynamic environment
- Excellence in stakeholder management - getting buy-in, find the best paths and walking the talk.
- Not being afraid of hands-on work
- A passionate team player.

Sound made powerful

ICEpower develops and delivers superior sound solutions for professional audio industries and end users all over the world. We conduct our business with some of the world's most prestigious brands within the audio and computer industry. We do so to elevate user experience and audio quality through solutions for consumer, professional, home automation, and mobile audio applications.

At ICEpower in Søborg, Denmark, you will join 70 dedicated colleagues. Mostly engineers.
